Majestic Assembly Instructions –Single Section Unit with Stand

Identify the parts of your cage:

Sides – 2pcs - ¾" wood frame, aluminum will face inside cage, groove running the height of panel will be to the back-inside of cage

Front Door Panel – 1pc - ¾" wood frame, aluminum will face inside cage

Back Panel – 1pc – ¾" wood frame, aluminum will face inside cage

Floor - 1pc – ¾" thick laminate for Reptile cages, **no floor for bird cages**

Top – 1pc- wood frame, aluminum will face inside cage

Stand – 1pc –Pre-assembled wooden stand with bottom, dimensions will vary depending on your cage size, may or may not have a door.

Crown Molding (for top of cage) – 4pcs- Wood molding, may be pre-attached to cages panels, 2 pcs are slightly shorter than the length (width) of the cage, 2 pcs are slightly shorter than the depth of cage.

Crown Molding Corners-4pcs-wood corners for top of cage.

No Floor Panel

Stand

If you have a pullout tray and/or floor, the appropriate track-work will be installed after your cage is completed.

Step1. Placing the Stand

Things to consider: You will need access to the back of the cage to complete the final assembly step, and to attach the back of your hood (if applicable). You will likely need to slide the cage into place; if you do not have casters, we recommend adhering heavy duty self-stick felt pads to the bottom of the stand to protect any hard floor surfaces.

Place preassembled stand near the final cage location. The stand has a ¾" thick lip at the top which sticks out into the stand. The sides, front and the back of the cage will rest on this lip. The cage floor (when applicable) will also sit on this lip.

Step 2. Attaching Front and Side

In order to prevent damage to your enclosure, use two people for this step. Place front panel on front lip of stand. The second person will set a side panel on the side lip of stand. Screw the front and side panel together with silver screws using pre-drilled holes. DO NOT attach the other side panel at this time.

Snug the front and side panel into the front corner of stand. Using silver screws, attach the side and front to the stand along the bottom edge from the inside of unit, DO NOT tighten the screws. The panels will now stand up on their own. See Illustration 1 for panel orientation.

Step 3. Placing the Floor Panel

If you have a cage with a pullout floor and/or pullout tray, skip this step. For cages with fixed floors, set floor panel down on the stand lip and snug it up to the front and side panels. No screws are used during this step.

Step 4. Placing the Back Panel

Attach the Back Panel in the same manner as you did the Front Panel.

Step 5. Placing the Second Side Panel

Carefully insert side panel into stand opening. Screw the front and back panel to the side panel with silver screws using pre-drilled holes.

After you are certain all of the panels are aligned you may now tighten all silver screws which attach cage panels to stand and panels to each other.

Step 6. Placing and Attaching the Crown Molding and Crown Molding Corners.

Your crown molding and corners attach to the cage with machine screws rather than being glued or nailed on ahead of time. This makes it possible to ad a hood, ad on additional cages or to stack additional units should you choose to do so at a later time.

Using silver screws, attach the crown moldings to the tops of all four cage panels from inside the unit; use pre-drilled holes. Get all screws for each molding started first before tightening any one screw. Place each crown molding corner over the crown moldings and using long black machine screws, attach them from the inside of unit; use pre-drilled holes.

Step 7. Placing and Attaching the Top Panel

In order to prevent damage to your enclosure, use two people for this step. Set top panel down with black aluminum facing into cage. Top panel should drop down into cage slightly. Secure top panel with black screws from the top of cage using predrilled holes.

If you have a pullout tray and/or floor see Majestic Enclosures Pullout Tray/Floor Track Installation Instructions on a separate sheet.
